

13 Updates

13.1 Significant changes in the Supply Base

There are no changes to the Supply Base. The BP is still sourcing below 200.000 tons primary feedstock from the regions of South and middle Jutland.

13.2 Effectiveness of previous mitigation measures

The mitigation measures have been effective. The harvest procedures implemented has improved the communication between forest management, the entrepreneurs and the forest owners.

13.3 New risk ratings and mitigation measures

No new risk ratings has occurred and the Supplier Verification Programme (SVP) has not yet been activated, as well as the Credit System

13.4 Actual figures for feedstock over the previous 12 months

All feedstock is primary.

Total volume of Feedstock: 0 – 200.000 tonnes pr. year (specific number is reported to the CB – and is considered to be commercially sensitive information. Skovdyrkerne has no dominant position in the market.

13.5 Projected figures for feedstock over the next 12 months

All feedstock is primary.

Total volume of Feedstock: 0 – 200.000 tonnes pr. year (specific number is reported to the CB – and is considered to be commercially sensitive information. Skovdyrkerne has no dominant position in the market place).
